		NOTE: This course examines race on legal, conceptual and practical levels. It traces the historical social construction of race, the legislation of racialized structures, the evolution of racist practices at individual, systemic, and institutional levels, and the effect of those constructions, structures, and practices on race relations in the United States. Part of this critical examination is the social location of racial and ethnic groups, including whites, as well as the intersections of race and other matrices of inequalities, such as class and gender. As a critical study, the theory underlying this course is Critical Race Theory (CRT).
