Of particular interest and importance is his treatment of government corruption and surveillance, the artificiality of individuality, and the perplexities of fate versus free will.

		NOTE: This course traces how images of African Americans became powerful tools in the fight for black freedoms in the United States from the late 18th century until the present day. The course readings closely examine how various visual media - engravings, photographs, carte de visites, and television - presented fights for black rights as necessary for the realization of true racial equality. We will study the many strategies that image makers used to persuade viewers that African Americans - from Phillis Wheatley to Michael Brown - deserved equality and justice.
