

Let your interest in health care lead you to a major ... and career!

Health care is one of the fastest growing and most secure fields for new graduates. Recent census data indicates that the health care industry is the **largest employer in 37 of the 50 states!**

Students choose to study in health-related majors because **they care about making a difference in people's lives** and in the well-being of their communities.

Students also find that health care jobs are **fulfilling and pay well.**

These programs are commonly in **the top five highest starting salaries** for SU graduates, and many are admitted to post-undergraduate professional programs like medicine, dentistry, pharmacy, physical therapy and occupational therapy.

In a recent study of SU graduates, **more than 90%** of graduates had secured jobs in majors such as medical laboratory science, respiratory therapy, nursing, and community health **within six months** of graduation.

90%

The aging of the U.S. population and the opportunity for new therapeutic innovations should keep health care jobs in **high demand in the coming years.**

If you are interest in a health care career, explore one of the many majors Salisbury offers to give you the best possible preparation for this promising field of the future.
